

Intelligent Sow Feeding

Deba Brothers® is a professional leader China Intelligent Sow Feeding manufacturers with high quality and reasonable price. Deba brothers intelligent precision feeding system is an automatic feeding control system for feeding and drinking of farrowing sows. According to requirement and feeder shape, delivery accurate quantity of feed and water, Deba brother intelligent feeding system improved farrowing sow feed quantity, increased milk quantity, improved sow health and avoid feed waste.

Product Description

Deba Brothers® is a leading China Intelligent Sow Feeding manufacturers, suppliers and exporter. With the experience of producing automatic feeding system, Deba Brothers® improved the scheme and produced a new intelligent sow feeding. For the sows, group management means more freedom to move, better health and robustness. Individual, intelligent sow feeding allows the feed supply to be matched precisely to the condition of the sow. For the farm manager, this means healthy sows, performance-related feeding and best use of the house surface area. The intelligent sow feeding can also be used to select sows automatically.

Intelligent Sow Feeding Advantage

1. Customized individualized and progressive feeding plan according to the needs of each sow; The maximum feed intake of farrowing sows can reach 8.5kg, and the maximum water intake can reach 80L.
2. No waste of feed (0.5kg of feed can be saved per sow per day).
3. No need to clean the trough.
4. Intelligent feeding, saving manual control.
5. Minimize the loss of sow back fat after lactation.
6. The time of estrus is shortened and conception rate is significantly improved.

Intelligent Sow Feeding details

1. Signal line transmission: data transmission is more stable.
2. The water and feed put together: the liquid feed is more delicious for sow.
3. Centralized display and operation of controlling box: breeders less enter the barn,
